PROFILE

Sole UI/UX designer at Taaghche, a reading app with 2M+ active users. I take features from discovery to shipped screens on Android, iOS and web, from an AI reading assistant to a pay-later checkout. Six years in architecture, interior and visual design gave me a strong eye for layout and hierarchy, and practice in explaining design decisions.

EXPERIENCE

UI/UX Designer · Taaghche

Nov 2024 – Present

Contract · Online bookshop and reading app · 2M+ active users · Android, iOS and web

- Sole designer for the whole product. I own discovery, user flows, wireframes, high-fidelity UI, prototypes, hand-off and design QA, and contribute to the design system, working with product, engineering and marketing.
- **AI Reading Assistant:** designed an LLM chat inside the e-book reader from start to finish. I explored 3 entry-point layouts, specified 14 screens and states, designed usage limits to control token cost, and logged 7 design-QA fixes before it shipped.
- **Checkout & Pay Later:** redesigned the subscription checkout on mobile and desktop with Snapp Pay installments, discount codes and wallet credit. I designed 4 payment states, so the button always shows the method and the exact amount.
- **Data features:** designed a reading-stats dashboard (calendar heatmap, charts, daily goals) and a 10-chapter Year in Reading story. I agreed with backend developers which statistics could be calculated reliably before starting the visual design.
- **Literary Avatars:** illustrated 22 book-shaped characters to replace 3 generic placeholders, validated them with a user survey before development, and handed them off for Android, iOS and web.

Freelance Designer · Self-employed

Jan 2022 – Nov 2024

Netherlands · Web, illustration and interior design

- Designed websites and digital illustrations for clients, building each client's colour palette and brand elements into the work.
- Worked directly with clients to understand their needs, presented options and iterated on feedback. I also delivered interior design projects in several locations.

Architect · LENS°ASS Architecten

May 2020 – May 2022

Freelance · Hasselt, Belgium

- Produced detailed drawings, competition entries, hand sketches and physical models, and handled calculations, site visits and material selection.

Designer · ZOOM.INDUSTRIES

May 2018 – May 2020

Maastricht · Intern, then part-time Architectural Designer, then full-time Designer

- Created 2D drawings and models in SketchUp and Vectorworks, and designed custom furniture for clients' floor plans.

UX/UI TRAINING PROJECTS · IRONHACK

- **C&A TimeTide**, Android shift planner: interviews, a survey of 21 employees, MVP, usability testing and a high-fidelity prototype.
- **Seed**, iOS habit tracker: heuristic analysis, branding, my own illustrations, user testing, landing page and revenue plan.
- **Eco-wave**, responsive magazine: reading dashboard, component library, accessibility, and basic HTML and CSS.

CASE STUDIES

AI Reading Assistant
Checkout & Pay Later
Reading Stats & Goals
Year in Reading Wrap-up
Literary Avatars

UX SKILLS

User research & interviews
Surveys & usability testing
User flows & information architecture
Wireframes & prototyping
UI design for mobile & web
Design systems & components
Data visualization
AI / LLM feature design
Payment & checkout flows
